EDUCATION

Lakshmi Narain College of Technology & Science, Bhopal

B.Tech, Computer Science | CGPA: 8.42 | 2022–2026

Shri Krishna H S School, Chhatarpur

12th Grade | Percentage: 89.4% | 2021–2022

Maharishi Vidya Mandir, Chhatarpur

10th Grade | Percentage: 86.8% | 2019–2020

SKILLS SUMMARY

Languages: Java, Spring Boot

Core Concepts: OOPS, DBMS, SQL

Tools: MySQL, Postman

Platforms: VS Code, IntelliJ IDEA

Soft Skills: Leadership, Communication, Team Management

PROJECTS

Smart Task Manager

Built a Smart Task Manager using Java Spring that lets employees log daily tasks and deadlines, while enabling admins to easily track progress without manual follow-ups.

- Built using Java, Spring Boot, MySQL, and REST APIs
- Implemented task CRUD operations with user login and admin dashboard
- Implemented backend logic using Spring Boot with clean controller, service, and repository layers.

Implementation Highlights:

- Designed the database tables for users and tasks, created REST APIs for adding, updating, viewing, and deleting tasks, and connected them to MySQL. Built services to handle the main logic and used Spring Boot controllers to expose the APIs. Also added login checks, basic validations (like empty fields), and clear success/error messages so the system works reliably for both employees and admins.

Attendance Management System

Developed an Attendance Management System using Java Spring to help employees mark daily attendance and allow admins to monitor records easily.

- Built using Java, Spring Boot, MySQL, and REST APIs
- Implemented attendance marking, daily status viewing, and admin management features
- Created clean controller, service, and repository layers for smooth backend flow
- Added basic validations and clear API responses for reliable record management

CERTIFICATES

Programming using JAVA – Infosys Springboard.

Java OOPs, exception handling, and basic data structures.
